

13 LINE SCHEMATIC

This line schematic is only for illustration purposes.

14 LINE LENGTH

The total line length has to be measured under a tension of 50 N. The difference between the measured length and the original length should not exceed $\pm 10\text{mm}$. Compliance of the test sample's suspension lines, brake lines and risers were checked by the testing laboratory after the test flights were completed.

Total line length and single linge length POISON4 size 95, 105, 115 and 125:
